Algorithm: cart shipping cost

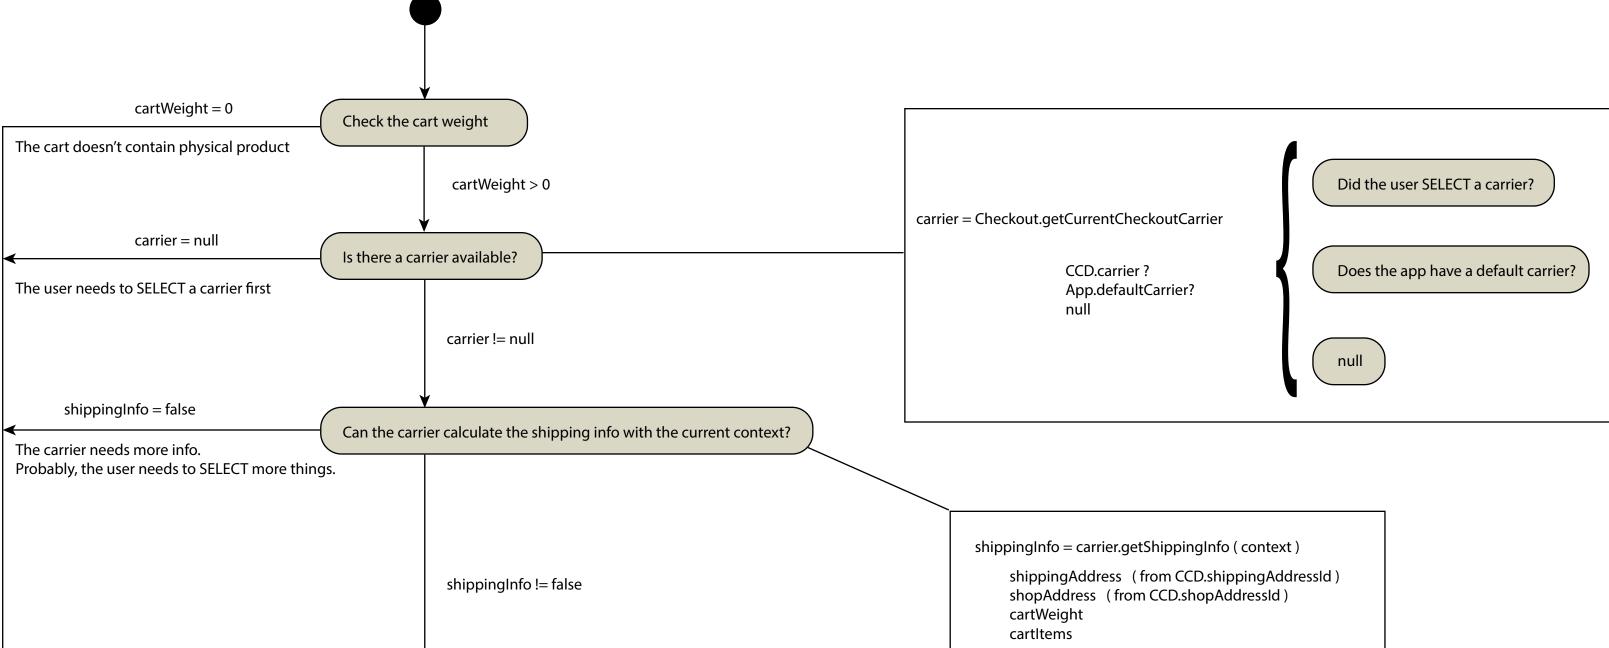

No shipping cost

(for now)

SELECT: select something during the checkout process

CCD

shipping_address_id
shop_address_id

In that case, we can use the shippingInfo

- estimated_delivery_date : null | date

- shipping_cost : number

CCD.setShippingAddressId

Hooks

If your shop has multiple addresses, CCD.setShopAddressId (get_closest_shop_address (shippingAddressId))

carrier_id

payment_method_id
